## Part Number Description

## Capacitance Tolerance

Three-digit (105) indicate rated capacitance in Pico Farad (First two digits indicate value & third digit indicates number of zeroes to be suffixed to first two digits).

For example:

103	=	10 × 10 <sup>3</sup>	=	10000 pF	=	10 nF	=	0.01 μF
104	=	10 × 10 <sup>4</sup>	=	100000 pF	=	100 nF	=	0.1 μF
105	=	10 × 10 <sup>5</sup>	=	1000000 pF	=	1000 nF	=	1 μF
106	=	10 × 10 <sup>6</sup>	=	10000000 pF	=	10000 nF	=	10 μF

## Capacitance Tolerance

In 3<sup>rd</sup> group of the part number-

F = ±1%, G = ±2%, H = 2.5%, I = ±3.5%, J = ±5%, K = ±10%, L = ±15%, M = ±20%, N=±30%

## Rated Voltage

In 4th group of the part number, one numeric digit and one letter (Ex.-2J) indicate DC voltage rating while two numeric digits (Ex.06) indicate AC voltage rating.

## Specific Data

Description	Value
Maximum tangent of loss angle	At 1 kHz 0.001
Voltage proof test between leads	640Vdc for 2 sec
IR between leads at 100 VDC	$\geq 1744 \text{ M}\Omega$

## Storage Conditions

Avoid storing the capacitors in places where the environmental conditions differ from the following:

- Storage time:  $\leq 24$  months from the date marked on the label glued to the package.
- Temperature:  $-40$  to  $80^\circ\text{C}$
- Humidity:
  - Average per year:  $\leq 70\%$
  - For 30 full days randomly distributed throughout the year:  $\leq 85\%$
  - Dew: absent

After a longer period of storage or use, the tolerance can increase; but, according to standard specification, it may never exceed twice the value measured at the time of delivery.

## Disclaimer

All our capacitors are designed, manufactured and tested to specifications. We strictly adhere to standards in procurement of materials, in the laid down manufacturing processes and consistently apply stringent process controls and testing parameters. This ensures that our capacitors always perform to the offered specifications.

Appropriateness of use in a specific circuit and fitness to a particular application however needs to be verified and its reliability through expected lifetime is required to be validated by the customer. Deki's responsibility is limited to ensuring that the capacitor performs as claimed in the specification/ data sheets provided by Deki. Deki specifically disclaims any implied warranties of fitness for any particular purpose. Liability, in any case is limited to the price paid for the capacitors.
